

Other Modes of Dissemination of Advisories

1. Analog display board

Analog display boards are set up at union level for farmers to see the realized weather conditions as well as next three days forecast. It will be helpful for farmers to protect crops from adverse weather condition. All the information on weather, weather based advisories are communicated through BAMIS Portal. Alert for weather information and need based farm management under extreme weather condition are also be displayed in the Board.

2. Agromet Kiosk

3. TABLETS
