

Feedback

Feedback from Regional Workshop & Farmers' Interaction

- ✓ It was possible to collect structured and useful feedback by organising the Regional workshops at 11 places and also through interaction with farmers.
- ✓ It was informed most of the beneficiaries that they have received the rainfall forecast well in advance from DAE and the forecast was very accurate and they could use the same ultimately for weather based farm operation successfully.
- ✓ There is demand to provide fortnightly, monthly and seasonal forecast for better decision making agricultural operations.
 - ✓ Issue of Agromet advisories for livestock, poultry and fisheries are appreciated.
- ✓ There is a great demand for advance warning from Bangladesh Meteorological Department for hailstorm and thunder and lightning.
- ✓ Request was made to provide fast and sustainable connectivity at offices in Ads & DDs to access & disseminate the information to the respective users in their jurisdiction.
- ✓ It is requested to revisit the list of mobile no. as there are number of defaulters who could not receive the SMS.
- ✓ It was suggested to make special strategies for flood (Haor region and drought (Barendra region) affected areas in Bangladesh.
- ✓ It was suggested to provide more number of Tablets officers in agricultural offices other than Sub Assistant Agricultural officers.
- ✓ Seeing the merits of the services already been provided to the farmers, it is suggested to plan its sustainability through meticulous exit plan
